# NEW JOURNEY FROM ROOTS TO FUTURE

## A Sixty-Five-Year Story Full with Experience and Innovation

After 65 years of an exciting journey, we are building a great success story full of experience and innovation, continuing our commitment to technology and delivering high quality products to our customers. We are full of great ambitions for the future and look forward to going even further together.

In its uninterrupted journey of 65 years, ELBA shines as living proof of an impressive success story, overcoming periodic milestones. Half a century into our experience, we are still full of freshness, dynamism and the will to achieve great goals.

Our confident stance stems from our confidence in our trained, highly qualified and highly experienced team, which is one of the underlying reasons for this long-lasting success. This collective knowledge and skill underpins our great enthusiasm for the period ahead. We are with you today as we were yesterday to ensure the successful design and manufacture of each and every one of your products.

Even though it was a year of slowdown in world economies, we are proud to end 2023 with successful exports to 43 countries.

Our commitment to technology allows us to continue our investments to not only meet current customer requirements, but also to meet future challenges. We strive to deliver each and every product to our customers with the highest quality. These efforts are a reflection of our commitment to high quality and safety standards, confirmed by ISO 9001 certification. We will always maintain our commitment to offer the best to our customers.

As our 65th anniversary approaches, we are excited about future achievements. ELBA's commitment to excellence, innovation and a global perspective will lead the protective film and tape industry to grow and prosper more than ever before.

Your support over our years together has helped us to take ELBA even further. We hope to achieve even greater success together in the future and thank you for being with us on our journey.

# HALF A CENTURY OF PASSION

ELBA Collective Company was founded in 1959 in Sisli, Istanbul. Initially, it produced plastic gloves, patient bags, isolation tapes and duct tape. In 1978, it moved from Sisli to Eski Buyukdere Street. In 1985, a group bought only the duct tape section and continued its activities as ELBA Bant A.Ş.

In 1992, in its factory with a closed area of 3,500 m<sup>2</sup> in Avcilar, it pioneered the production of protection tapes, which were not produced in Turkey, and added solvent-based polyethylene protection tapes to its product range.

In 2000, ELBA started to produce protective tape in its own facilities in 2004 and built a new factory in Çerkezköy. In 2005, ELBA continued its investments in protective tape production and completed the integration process. In addition to protective film production, the company integrated its services adhesive production, printing,

coating and cutting machines in a total closed area of 32,000 m<sup>2</sup>.

ELBA expanded its product range by starting to produce solvent masking tape in 2008. In 2010-2011, ELBA expanded its product range by starting the production of different films.

In 2013, ELBA expanded its machine park with an extremely high-tech production machine and started to produce solvent-based, water-based acrylic, water-based protective tape, OPP duct tape, masking tape and PVC and MOPP tapes.

Turkey's leading protective film manufacturer ELBA was acquired by Mediterra Capital in 2022 and strengthened its position in the world markets with its professional team. It continues to meet customer needs with advanced technology and a wide range of products.

ELBA, Çerkezköy, Tekirdağ

“

With a rich history dating back to 1959, ELBA continues to meet customer needs both in Turkey and around the world. Acquired by Mediterra Capital in 2022, ELBA continues its leadership with its professional team with high sectoral experience.

“

As ELBA, we are committed to setting environmental goals and targets by determining the contribution of our products to environmental impacts in advance. To achieve these goals, we examine the life cycle of our products from beginning to end and apply environmental protection principles in the most effective way at every stage. We are working hard to reduce waste and minimize environmental impact.

”

# ENVIRON- MENT & ELBA

As an environmentally conscious company, we are constantly working to encourage the conscious use of natural resources and energy. We also organize training and awareness-raising activities within the company to improve the environmental awareness of our employees. We always approach public sensitivities, legislation and relevant information with interest and responsibility. We are committed to fully comply with the requirements of the relevant environmental legislation, and we are determined to prevent pollution and minimize its impact on the environment by adopting a continuous improvement approach.

This policy is open and publicly accessible not only to our employees but also to all persons working on behalf of our company. In this way, everyone has the opportunity to observe more closely our commitment to environmental protection and quality. Because at ELBA, we are aware that we are not only responsible for our work, but also for the future of our environment and our world.

We support environmentally friendly production principles by recovering hundreds of tons of solvent with the solvent recovery system.

We use resources more effectively by recycling energy for solvent recovery. We meet our domestic heating and energy needs with recycled energy, thus ensuring a production process that respects nature. We process solid waste with biological treatment and dispose of it without harming the environment.

We are advancing our goal of utilizing renewable energy resources with our R&D studies on wind and solar energy. With these commitments, we continue our activities as a company sensitive to both the environment and quality.

# QUALITY

**We prioritize quality and safety in every product we produce.**

*With years of experience, we aim to offer the highest level of satisfaction to our customers and work in this direction.*

ELBA recognizes and strictly adheres to quality and excellence as a primary principle. It rigorously complies with the ISO 9001 standard and is committed to meeting the highest quality standards. It encourages the development of its employees through continuous training opportunities and investment in the latest technology, thus producing high quality products. Dedicated to understand the needs of its customers and to exceed their expectations. Our commitment to quality and excellence is evident at every stage of our business and we constantly strive to provide our customers with the highest level of satisfaction.

ELBA attaches great importance not only to quality but also to occupational health.

It rigorously applies occupational health and safety standards in its workplaces and follows the latest developments in this field. It takes all necessary measures to ensure the safety and well-being of its employees. In this way, we keep the safety of our employees at the highest level by exhibiting a sensitive approach to occupational health. Occupational health and safety is one of the core values of our company and we put these values at the center of all our business processes.

ELBA is committed to providing the best solutions to protect your special materials with 109 different formulas, 10 different product options and unlimited choices tailored to your expectations.

# SOLUTIONS

## The best for your valuable materials with unlimited solutions...

ELBA's expertise requires a deep understanding of all kinds of materials. From aluminum composite panels to PVC profiles, stainless steel to pre-coated metals, plastics to glass, and decorative laminates, it is our job to understand and protect different materials. We are familiar with demanding production processes and successfully pass quality tests, and our products are successfully applied to even the most demanding stages, from laser cutting to deep drawing.

As a result of many years of cooperation and listening to our customers, we constantly innovate. For us, every customer is special. That's why ELBA is committed to providing the best solutions to protect your specific materials, with 109 different formulas, 10 different product options and unlimited choices tailored to your expectations.

In addition to providing customized solutions for our customers, we work as a dedicated team to complete your projects with the highest level of satisfaction. Our customer-oriented approach is based on long-term collaborations and trust. That is why ELBA handles every job with great

care and attention, ensuring the results are of the highest quality. With its wide range of products, ELBA develops strong protection, perfectly accompanying your materials in your production processes. This powerful protection maximizes the preservation of your product, when it is exposed to different treatments in different industries.

When choosing the ideal protective film for your needs, we take into account the behavior of your surfaces. This guarantees the following: Satisfactory initial adhesion, stability over time, and economically and ecologically optimized protection.

Furthermore, by constantly monitoring and investing in technological developments, we are committed to always offering our customers the latest innovations in the sector. Using its expertise in technology and engineering, ELBA is constantly improving its products and making every stage of its production more efficient and environmentally friendly. We strive to provide better service to our customers and will continue to maintain this commitment in the future.

# SURFACE PROTECTION FILMS

We consider four key factors to determine the solutions we offer our customers: Material, manufacturing process, product life cycle and the condition of the surface to which it will be applied.

Moreover, we have a research laboratory capable of surface analysis and testing film behavior. This allows us to offer solutions that best meet the needs of your material.

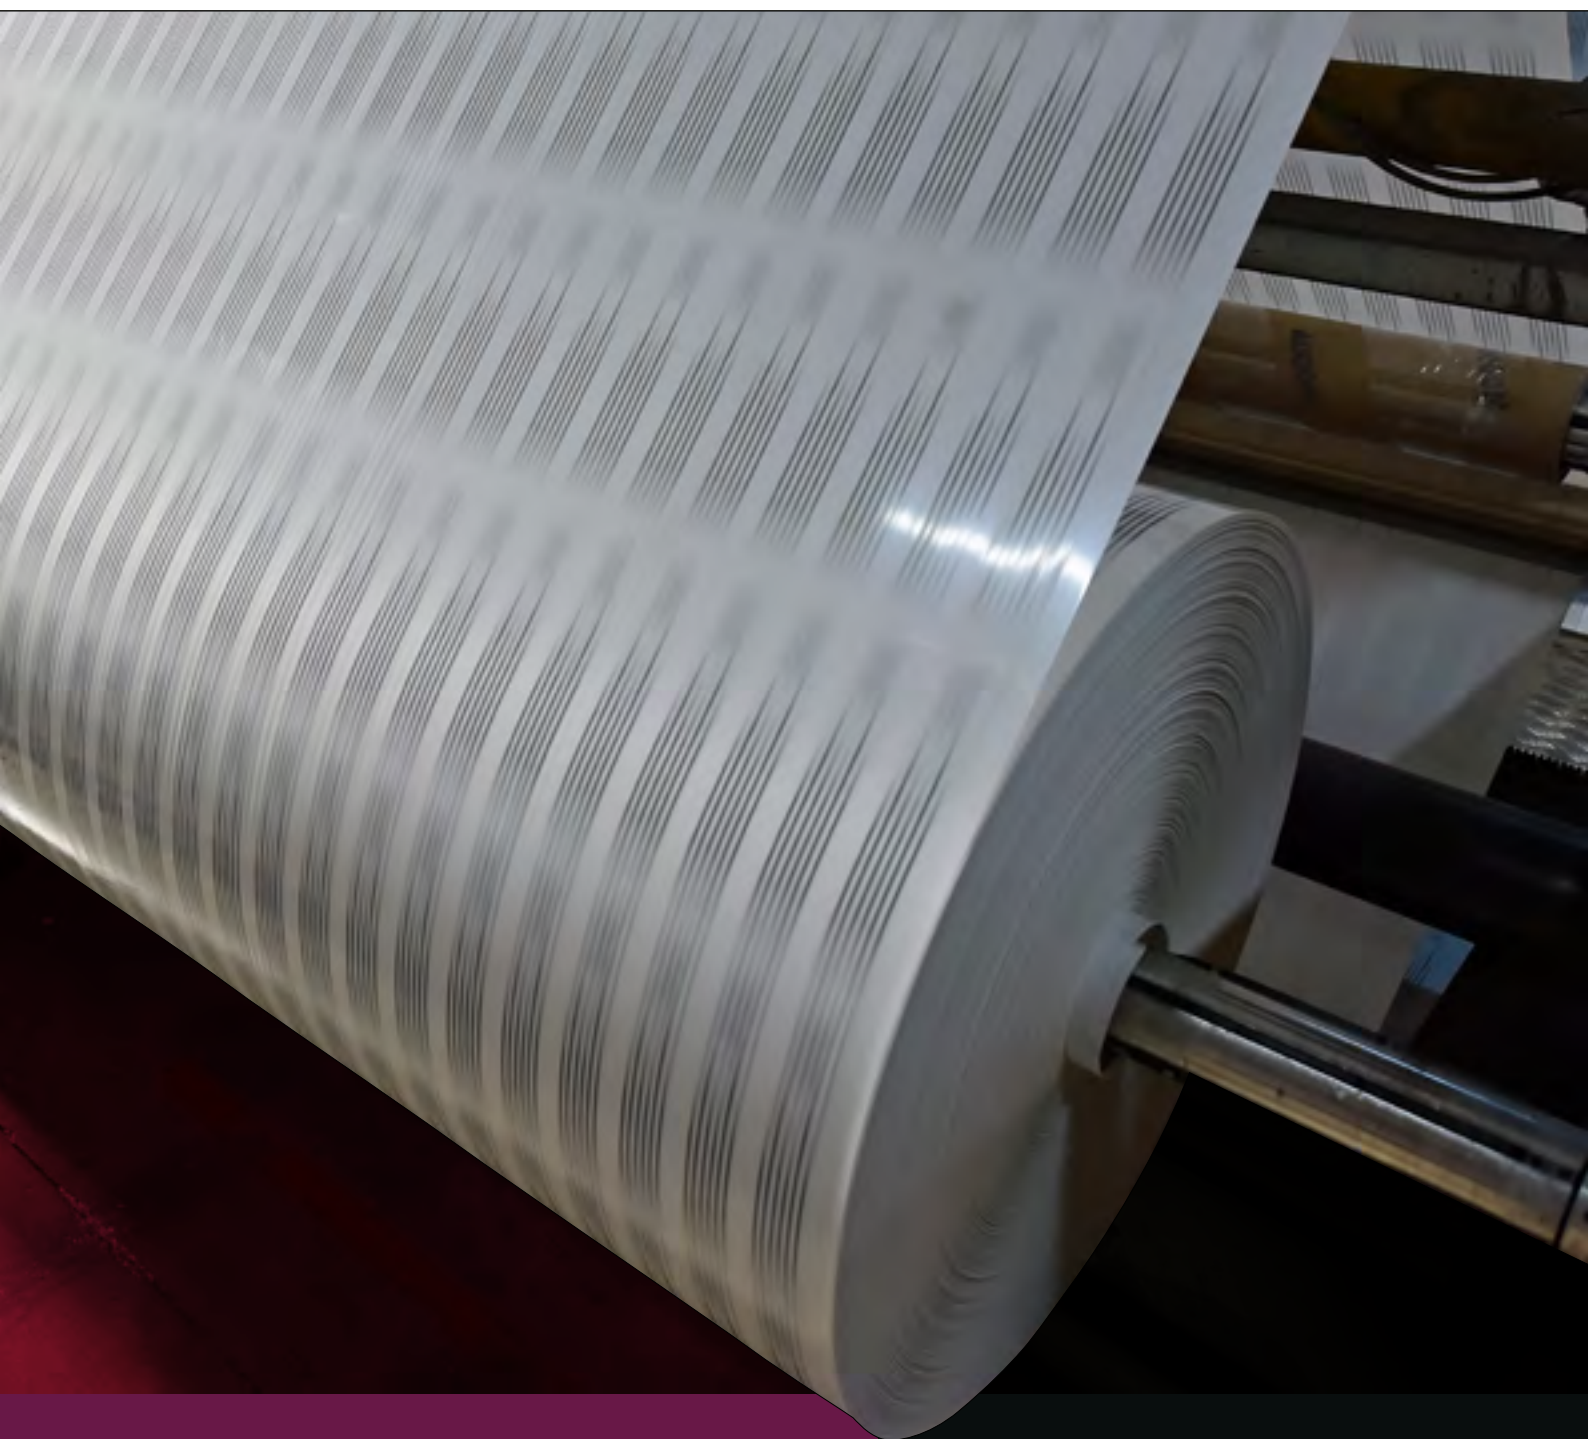

## Areas of Usage

- Aluminium Profiles and Aluminium Composite Sheets
- Plastic Profiles and Sheets
- Stainless Steel Sheets and Coils
- Pre-Coated Metals
- Glass and Mirrors
- Different types of wood scratch sensitive surfaces

## Technical Specifications

- It has UV resistance.
- Easy to stick and easy to remove.
- Leaves no glue or traces when removed.
- Complies with ISO Standards.
- Clear Transparent, Transparent Blue, Black, White, Black & White films and 6 color printing options.
- Available in 30 mm to 2100 mm widths.
- Available in desired roll length.
- Natural rubber or water-based acrylic adhesive

# TAPES

ELBA's parcel sealing, masking, PVC & MOPP tapes offer a variety of color, adhesive and strength options to meet your specific requirements.

## Duct Tapes

ELBA's printed and unprinted duct tapes offer versatile solutions for packaging, wrapping and carton sealing.

## Masking Tapes

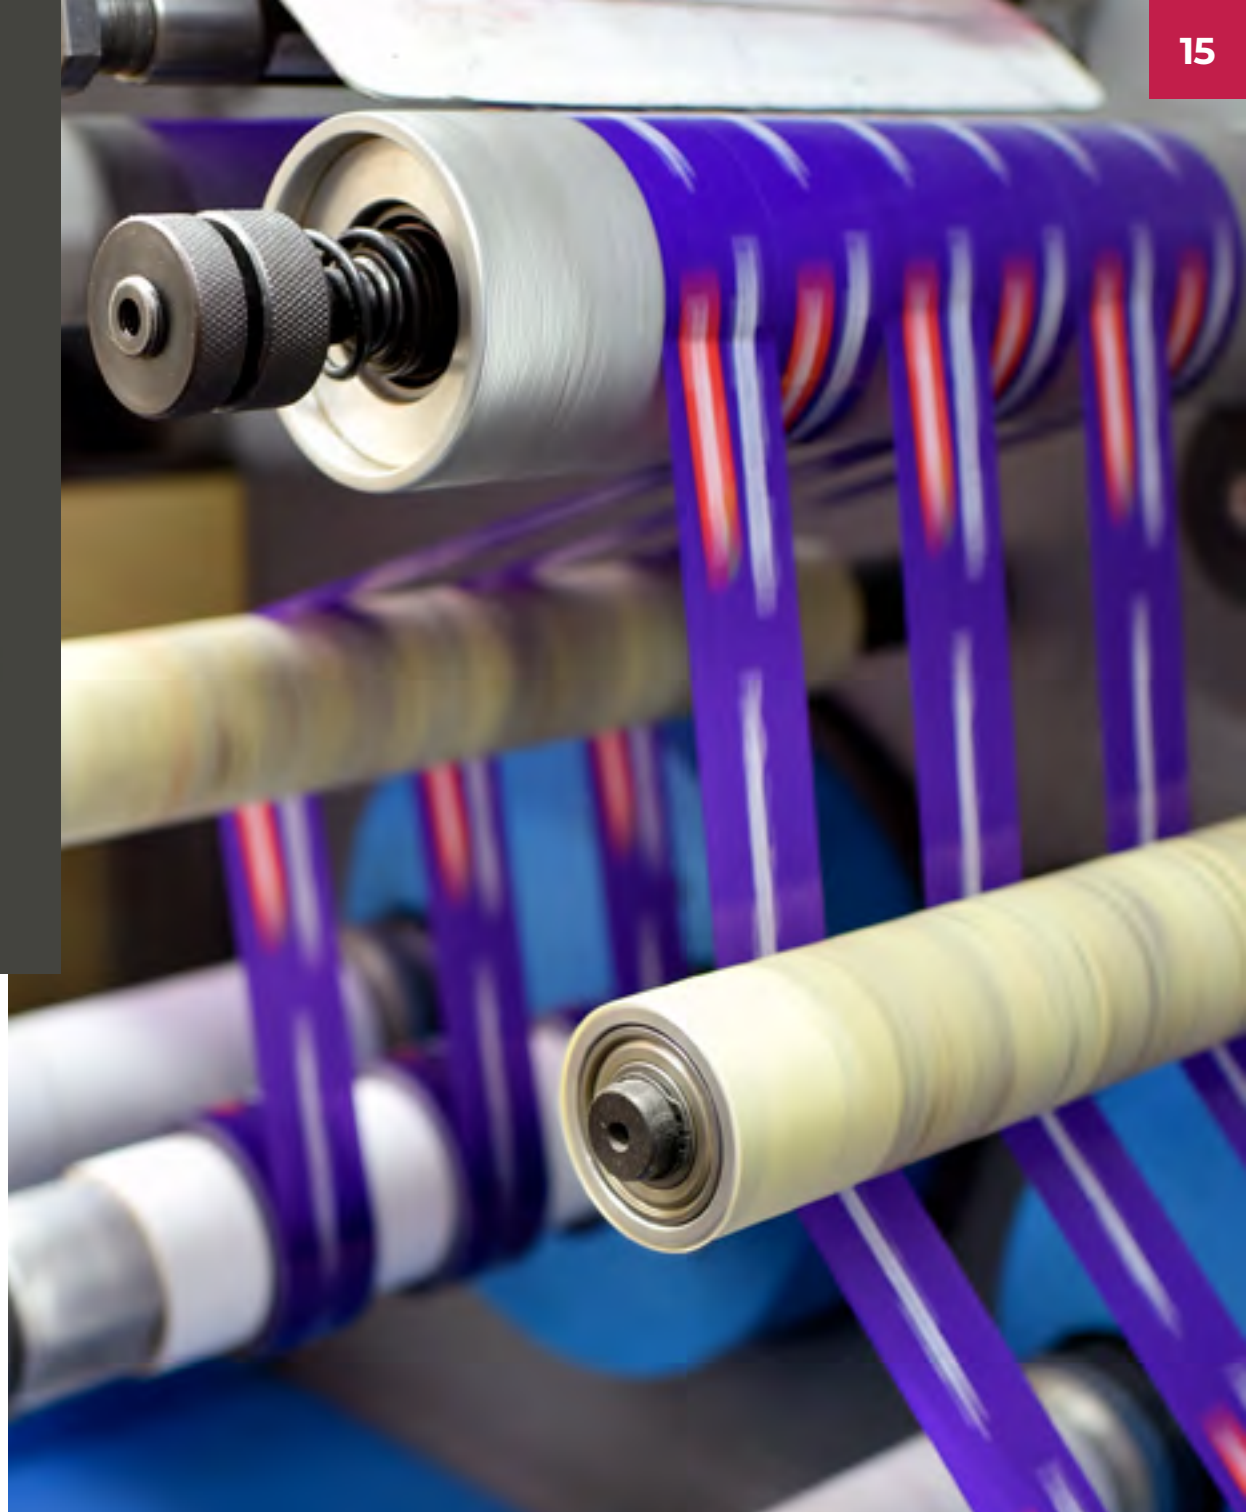

ELBA masking tapes provide strong adhesion in both industrial and general use. They perform extremely well at high temperatures.

## PVC and MOPP Tapes

They are tapes in various colors, with strong adhesion, especially preferred in automotive and white goods production.

## Duct Tapes

### Technical Specifications

- Produced with hotmelt glue technology
- Has strong adhesion properties
- Can be sliced in desired widths between 12 mm and 150mm
- 1.600 mm width production is possible
- Available as jumbo roll upon request

## Masking Tapes

### Technical Specifications

- Produced with solvent-based natural rubber glue technology
- 80°C-120°C heat resistant
- Has strong adhesion properties
- Easy to remove without leaving traces
- Available as jumbo roll upon request

## PVC and MOPP Tapes

### Technical Specifications

- Produced with solvent-based natural rubber glue technology
- Has strong adhesion properties
- Easy to remove without leaving traces
- Available as jumbo roll upon request
